

# HERMANN KAO

A GEEK AND A BIG DREAMER

## MAIN OBJECTIVE

I am a Computer Science student. I am highly interested in entrepreneurship and finance. I am planning to build a digital venture by 2032.

## ACCADEMIC HISTORY

**3iL Limoges | Since 2019**

Computer Science and engineering

**ESSTI Maroc | 2016 - 2019**

Preparatory classes and Mechanic engineering

**College Saint Joseph Lomé | 2016**

Scientific Baccalaureate

## HOBBIES AND INTERESTS

- Reading, Currently reading *Influence et Manipulation* by Robert Cialdini
- Cooking
- Astronomy and space, I have a giant Saturn V model at home
- Building computers and servers
- Volunteer, Currently engaged in MakeSense's Re\_action program

## VOLUNTEERING

- **To go to Togo**, we've told Sokodé's Peoples awareness of the use of toilets
- **Association Les Rangs d'honneur**, we talked about science and tried to convince El Hajeb city's student to study engineering and bring them medkits
- **MakeSense Re\_Action**, I've called seniors to keep them happy and distributed first aid kit to homeless

## CAREER HISTORY

**Fullstack Javascript developer and DevOps intern**

Nobo.life | 04/2020 - 09/2020

- Implemented new CI/CD pipelines based on Jenkins, BitBucket and Sonarqube for API, Front-End and mobile apps
- Setup ELK Stack for monitoring the apps in production
- Added new features to internal mobile apps, websites and API
- Administrated debian servers with a microservices Architecture
- **Tools used**: Next.Js, React-Native, Express.Js, Mysql, Docker

**Mobile developpement Intern**

Midou | 10/2018 - 06/2019

- Created design for mobile app and website
- Worked closely with early founders and built the app
- Brainstormed new design and feature ideas
- **Tools used**: Firebase, MapBox, React-native, PHP

**Industrial maintenance Intern**

SODIGAZ | 07/2019 - 08/2019

- Practiced electrical systems and pression monitoring
- Learned gas production process

**Automotive maintenance intern**

DIWA | 07/2018 - 08/2018

- Learned to change oil filters, tires and in emergency cases, make use of handmade tools to repair tires

## PROJECTS

**Carend Diary**

Journaling made easy

- **What**: Journaling for the future generations. A minimalist app that allows to journal your day.
- **Why**: It's easy to get lost when starting journaling and guided journals are too narrowed
- **Result**: Beta App launched in November 2020
- **Skills learned**: Offline first app building, react-native framework and Mobile app DevOps practices

**Shes.link**

Make it short

- **What**: An API first url shortener
- **Why**: Many url shortener services don't expose their API
- **Result**: Launched in September 2020, almost hit 100 weekly users
- **Skills learned**: Node.js and express.js API building, Heroku deploymement and monitoring and Node.JS testing and DevOps practices

**Hermann.Codes**

Sharing a Knowledge to learn faster

- **What**: A blog where I publish every new things I learn
- **Why**: Sharing skills and things I've learned
- **Result**: Launched in October 2020, I have 7 users that subscribed to my mailing list
- **Skills learned**: Web Marketing Basics, Community management, Content Writing and Improved my english

**SnowTrust**

Building the future

- **What**: A digital web agency
- **Why**: I wanted to try entrepreneurship
- **Result**: Launched in November 2019, We are still trying to grow our portfolio
- **Skills learned**: Team management, project budgeting and management, Client prospection, Interpersonal communication and learned to launch a product to the market.
